AKIB RAHMAN

Electrical & Electronic Engineering | Final-year student

Dhaka, Bangladesh • akibrahman499@gmail.com • +880 170 737 4047

PROFILE

Final-year EEE student at American International University–Bangladesh (AIUB), expected to graduate in 2027. Interested in digital design, embedded systems and semiconductor technology. Brings hands-on academic project experience integrating machine learning with Raspberry Pi 5 and ESP32 hardware, alongside collaborative microcontroller work.

SELECTED PROJECTS

Autonomous Wheelchair for Safe Navigation & Remote Biomedical Monitoring

Capstone project • Team of four

Integrated machine learning with Raspberry Pi 5 and ESP32-based embedded hardware for a mobility-focused capstone. Presented the technical work to supervisors and external evaluators, who described it as technically sound with real-world applicability.

ATmega328P-Based Smart Farm System

Group project • Team of six

Collaborated on a smart-farm system built around an ATmega328P microcontroller and contributed to IEEE-style technical reporting.

EDUCATION

BSc, Electrical and Electronic Engineering — AIUB

Expected 2027 • CGPA 3.66 / 4.00

Higher Secondary Certificate — St. Gregory High School and College, Dhaka

GPA 5.00 / 5.00

Secondary School Certificate — Ghorashal Pilot High School

GPA 4.89 / 5.00

TECHNICAL SKILLS

Digital design	VLSI, SystemVerilog (intermediate)
Programming & analysis	C/C++ and MATLAB (intermediate)
Embedded platforms	Raspberry Pi 5, ESP32, ATmega328P
Engineering foundation	Circuit analysis, electrical machines, electronics, embedded systems
Project practice	Team collaboration, technical presentations, IEEE-style reporting
